

Installing Oracle SQL Developer

1. The following is the link to the version of SQL Developer that is install in the Lab. Click on this link and save it to you PC
<http://www.comp.dit.ie/btierney/sqldeveloper-1.5.5.59.69.zip>
2. Create a directory on you PC. You will unzip the downloaded file into this directory
C:\Oracle SQL Developer
3. Unzip the download file into this directory. There is no install or setup to run. (This is an unzip not an install so there will be no link on your star-menu)
4. The executable for Oracle SQL Developer
C:\Oracle SQL Developer\sqldeveloper\sqldeveloper.exe
5. Create a shortcut for this executable and put it on your desktop
6. To run Oracle SQL Developer double click on the shortcut you have just created
7. The first thing you will need to do is to create a connection to the Oracle database.

- a. Click on the create connection button

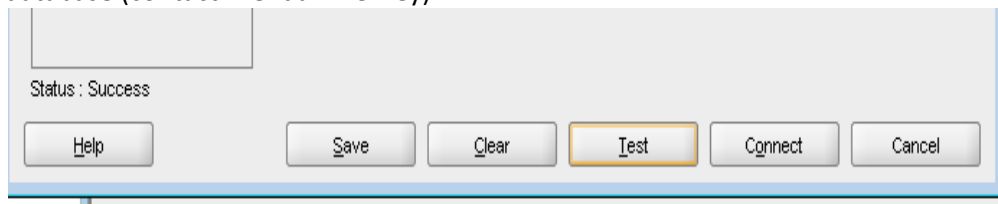

- b. Enter the connection detail
 - i. Connection Name : this can be anything you want – it is just a label
 - ii. Username : Your Oracle username (also you network username)
 - iii. Password : Your student number
 - iv. Host Name : ferdia.student.comp.dit.ie
 - v. SID : ora11gdb

Installing Oracle SQL Developer

- c. Click on Test – You should get a message saying “Status : Success”. If you did not get this message then the connect details were not entered correctly or you do not have access to the Oracle database (contact Brendan Tierney)

8. Click on Connect to start using SQL Developer to process your SQL.
